

How to install apps from Harsco's App Store

Use the following steps to install apps in Harsco's App Store. These apps are not required but a list of suggestions and recommendations. Some apps may incur costs so please verify before downloading.

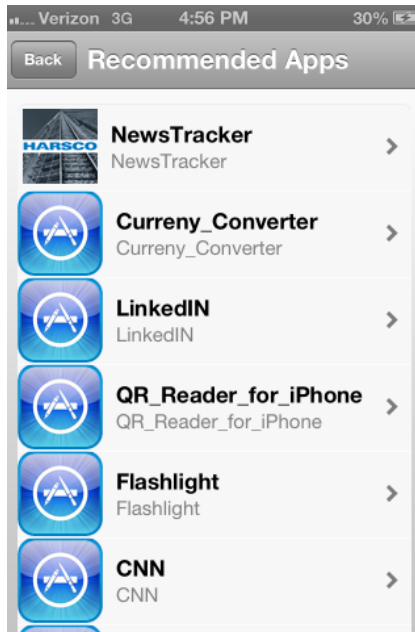

1. Go to the McAfee EMM app on your device and open the app

2. Once the app has logged in select "Recommended Apps"

3. Scroll and Select the app that you wish to install to your device

4. Once the app is selected it will direct you to the appropriate download storefront in the App's store. Click Install. Please be advised that you may need to enter your iTunes account to download certain apps.
